Spectrum Baroque™ is a modern version of hand-blown “reamy” antique glass. By slowly stirring together glasses of carefully mismatched compositions, we create a dimensional swirling texture and vivid color contrast. A Spectrum exclusive.

Artique®

Artique® is a re-creation of the spirit and character of mouthblown antique glass. The texture is scribed into the glass surface while the sheet is still extremely hot and pliable.

Waterglass®

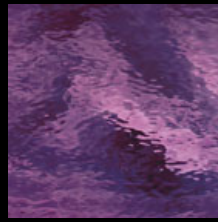

Spectrum Waterglass® is a natural surface texture created by stretching the hot glass sheet while it is still pliable. The result is gentle, rolling waves that resemble the surface of a lake or stream — exclusively from Spectrum.

Opalescent ^{Wispy}

Wispy Opalescents are traditionally composed of about 3/4 cathedral glass color and about 1/4 opaque white glass. The white opal is hand-ladled into a moving stream of cathedral color. The two glasses are then stirred together, by hand, just before the sheet is formed creating the characteristic wisps.

Two fusible Wispies are available as Opalescent color stirred into a Clear base.

Semi Translucent Opalescent

Semi-Translucent Opalescent mixes are primarily opal glass, eliminating the perception of images through the sheet. These glasses are highly reflective in nature, but when backlit they reveal a captivating, luminescent glow.

Translucent Opalescent

The translucent Opal mixes are about 50-50 cathedral color and white opal glass. The larger proportion of opaque white reduces light transmission and increases surface reflection. Some translucents involve multiple cathedral colors with white, and others use colored opals to achieve their individual character.

Art glass takes on many forms and attends to many functions. In the craft-conscious home, fine cabinetry features the inherent beauty of art glass sheets. Privacy windows have upgraded from run-of-the-mill patterned glass to more tasteful alternatives, becoming subtle details of architectural art and accent. The Spectrum for the Home line narrows the chasm between common patterned glass and Glass Art, providing both elegant and rustic new choices in home décor.

COVER ART: Clockwise from upper left, Calgary Firefighter's Memorial designed by Metz & Chew, Vancouver, BC, fabricated by Goldray Industries, Calgary, AB; "Haiku" Chandelier by Rick Strini, Strini Art Glass, Maui, HI; multi-story, vertical "wet wall" tile design/installation by Lightstreams Glass Tile, Santa Clara, CA; "Hi no De" stained glass piece (detail) featuring OpalArt™ by Aanraku Glass Studios Instructor Tamra Boncore & Students, San Mateo, CA.
